Attention: FIFRA § 6(a)(2) Office

Attached is the required information for individual incident reports (Internal ID Number 3929) pursuant to FIFRA § 6(a)(2).

BASF understands FIFRA § 6(a)(2) to require reporting of incident information when there is an allegation of exposure and effect. Therefore this report should not be considered an admission of causation, but rather disclosure of information reported to BASF Corporation.

If further communication is needed, please contact me at (919) 547-2607.

Respectfully submitted,

John Arthur  
Manager, US Registrations

FIFRA 6(a)(2) Incident and Effect Information  
Submission Report Form

**Internal Incident Number: 3929**

Date BASF became aware of incident: May 16<sup>th</sup>, 2014

Date of Incident: April 10<sup>th</sup>, 2014

Individual affected: n/a

Location: CA

Products: Clearcast

Active Ingredient: Imazamox

EPA Registration Number: 241-437

Incident Type: P-A

**Summary of Incident:**

The incident occurred on a golf course. Clearcast was applied by hose end spray gun to control cattails on the edge of a pond. The product was not applied directly to the pond but was applied from uphill and apparently more got in the water than anticipated. One and half acre of newly seeded bentgrass greens were then irrigated with water from this pond

The new grass did not die but was found to be in a growth regulated state. At the time of the report no chlorosis was evident. The treated pond was not held for 24 hours, as per label irrigation restrictions.

Report prepared by:

John Arthur  
Manager, US Registrations
